

## . NUTRITION- ORIENTED INTERVENTIONS

During the year under review, the Environmental health and sanitation unit in collaboration with the Municipal health directorate carried out nutrition oriented intervention programs.

These interventions are aimed at improving good health and diseases prevention.

The table below shows nutrition oriented interventions carried out in the municipality.

| S/N | NUTRITION- ORIENTED INTERVENTION               | TARGET GROUP          | TOTAL NO. ENROLLED        | CHALLENGE   | THE WAYFORWARD   |
|-----|--|-----------------------|---------------------------|---|--|
| 1   | Vitamin A supplementation                      | 6 months to 59 months | 5422                      | Low coverage  | Increase school health services to reach more children                             |
| 2   | Girl Iron Folic Tablet supplementation (GIFTs) | J.H.S- S.H.S<br>Girls | 1185                      | Some J.H.S and S.H.S girls refuse to take the tablets because they think is a source of family planning | Enhance Sensitization of girls, opinion leaders and stakeholders on GIFTs          |
| 3   | Iron and Folic Acid (IFA) for pregnant women   | All pregnant women    | IFA 3= 2781<br>IFA 6= 963 | Anaemia in pregnancy at 36 weeks high   | Sensitize pregnant women on need to report early to health facility when pregnant. |
